SEMANTOGRAPHY IS THE COMING TOOL FOR SCIENCE, INDUSTRY, EDUCATION AND COMMUNICATION

SEMANTOGRAPHY is the first practical realization of a prophecy made 300 years ago by the great mathematician and philosopher, G. W. Leibniz, the coming of a new Medium for Mankind which would incorporate a simple Logic and Semantics applicable to every problem, every thought, every word in all languages.

SEMANTOGRAPHY the new Mind Mathematics for Man, the new Medium for Mankind, has been praised by every scholar who studied it, among others—

A Logician: BERTRAND RUSSELL (London) "I think very highly of it . . . Any men who will spend the money necessary to get this work printed will, in my opinion, be performing an important service to mankind."

Biologist: JULIAN HUXLEY (London) "Semantography provides something of real importance."

A Philosopher: Professor OLIVER L. REISER (Pittsburg) "Bliss realized the ambition of the great mathematician Leibniz . . . heroic work . . . a powerful stimulus . . ."

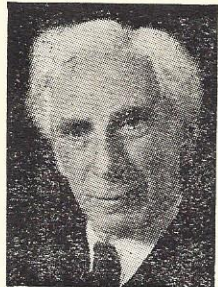

An Educationist: Professor CARLETON WASHBURNE (New York) "ingenious . . . could be of great value."

A Scientist of varied fields: Professor LANCELOT HOGBEN (Birmingham) "interesting . . . stimulating . . . fascinating . . . ingenious."

A Physicist: Professor V. A. BAILEY (Sydney) "deserves every encouragement by private and public means . . . would be of great value to scientists."

A Psychologist: Professor G. PATRICK MEREDITH (Leeds) "sheer fascination . . . such an important creative advance . . ."

A Librarian: JOHN METCALFE (Sydney) "This book should be available in the larger public and university reference libraries throughout the world."

Bertrand Russell
